THE SUPREME COURT *of* OHIO

What Testing Conditions are Required?

Examinees must be alone in the room where they are taking the exam. This should be a quiet and distraction-free environment. Examinees should remain seated with their entire face visible to the camera for the duration of each 90-minute test session. Examinees should regularly check their camera view during the mock exams and on exam day to ensure their camera is functioning correctly and showing their entire face.

How Does Exemplify ExamID facial recognition work?

ExamID authenticates the identity of examinees to ensure that the person taking the exam is the person who registered for the exam. During the first mock exam, ExamID will take a baseline photo of the examinee. Examinees are urged to have a well-lit room to provide adequate lighting for the photo. It is highly recommended that examinees take this baseline photo in the same well-lit room they intend to take the exam. The software will confirm that the photo taken is acceptable. At the start of each exam session, ExamID will take another photo of the examinee and will compare it to the photo taken during the mock exam to authenticate the examinee's identity. Should an examinee experience an issue with the ExamID authentication at the beginning of an exam session, the examinee will still be permitted to take the exam and Office of Bar Admissions will authenticate the examinee's identity through the video.

How Does Exemplify ExamMonitor (remote proctoring) Work?

The proctoring software will record the examinee (both audio and video) throughout each exam session. The recording will be uploaded to ExamSoft along with the examinee answer files. Once an examinee ends a given session, they may walk away from their computer and the webcam during the break (the audio and video are NOT recording at this time). Examinees must remain at their computer, with their face visible to their webcam, for the entirety of each 90-minute test session. When you submit your exam responses, this video is analyzed by ExamSoft's artificial intelligence (AI) program that will flag any unusual behaviors, movements, or audio. All flagged footage is then reviewed by at least one human proctor to determine whether further analysis as to potential cheating is necessary. For example, a dog barking in the background may be initially flagged by AI, but cleared upon review. These proctors reviewing exam footage will not have access to any personally-identifying information for examinees; all exam materials, including exam footage, are connected only to an examinee ID number.
