

HOW TO USE THE SB201 CALCULATORS
CONCURRENT AND CONSECUTIVE
Judge Ashley Kilbane – Presentation 5/19/22

When you first download and open the file, a yellow band will pop up at the time. Click “Enable Editing” and the “Enable Content.”

THREE MAJOR INPUT RULES:

1. Only use Concurrent tab for concurrent sentences. DO NOT use concurrent tab if specs from *different* counts run consecutively – use the consecutive tab.
2. Specs, F1s and F2s are entered in **YEARS**; F5-F3s must be entered in **MONTHS**
3. If gun specs run consecutive *within* a count, you must manually add and enter total spec years for that count. For example, for a 3 and a 5 year spec on a *single* count, enter 8.

Concurrent Examples:

Example 1:

Count 1: F1 – 6 Years

Count 2: F2 – 5 Years w/ 3 year spec

Outcome: 9 to 12 Years

(3yr spec + 6 yrs = 9yrs min; +3 year tail = 12yrs max) (tail calc on Ct 1)

Example 2:

Count 1: F1 – 5 Years

Count 2: F2 – 6 Years w/ 3 year spec

Outcome: 9 to 11.5 Years

(3yr spec + 6 yrs = 9yrs min; + 2.5 year tail = 11.5yrs max) (tail calc on Ct. 1)

Example 3:

Count 1: F2 – 3 Years w/ 18month gun spec (enter as 1.5)

Count 2: F3 – 60 months (high tier)

Outcome: 6.5 years – no tail

A warning will pop up noting that the minimum term will outlast any indefinite term.

Consecutive Examples:

Basic Rule: “Click it” if you want it to count consecutively. Notice the cells will highlight red if it is counting the entry as a consecutive entry.

Example 1:

Count 1: F1 – 10 yrs

Count 2: F2 – 5 yrs

Count 3: F2 – 4 yrs

Count 4: F3 – 12 months

- All run consecutive

Outcome: 20 to 25 years (5 yr tail on count 1)

Example 2:

Count 1: F1 – 11 years with RVO (10 years)

Count 2: F2 – 5 years with 18 mo spec (1.5yrs)

Count 3: F3 – 60 months (high tier)

- All run consecutive

Outcome: 34 to 39yrs & 6 months

(11.5yrs specs + 21yrs min = 32yrs 6m min; + 5y6m tail = 38yrs max)

Example 3:

Count 1: F1 – 9 years w/ 3 and 5 year spec

Count 2: F2 – Merges, but 3 and 5 year spec

Count 3: F3 – 24 months

Count 4: F5 – 6 months

- Counts 1 & 2 Merge, but because of 2929.14(B)(1)(g), the 3 years must run consecutive.
- Note that you can only *enter* one 5 year spec because 5yr specs not subject to same rule.
- You order count 3 to run consecutive, and count 4 to run concurrent

Outcome: 22 to 26 Years and 6 months

(11yrs specs+ 11 yrs min = 22yrs min; + 4.5 year tail = 26yrs 6m max)
