## **Agency and Available Data: ODRC**

This explanatory document is designed to highlight the available data for analysis to inform policymakers pursuant to the Ohio Criminal Sentencing Commission's duty to study the comprehensive criminal sentencing structure in the state of Ohio. Among other duties, the Commission is to study the fiscal and other impact of the sentencing structure on the corrections system, as well as review bills introduced in the general assembly that provide for a new criminal offense or that change the penalty for an existing criminal offense. As such, this primer is designed to understand data available at the statewide level for analysis as well as gaps in the data that would be useful for the duties of informing the general assembly and other policymakers.
