2011 OSDPN MEETINGS & RSVP

THE OHIO SPECIALIZED DOCKETS PRACTITIONER NETWORK

With over 140 specialized dockets in operation throughout Ohio, the Supreme Court of Ohio, the Ohio Department of Alcohol and Drug Addiction Services and the Ohio Department of Mental Health have recognized the need for interaction among the professionals that staff these courts. In order to provide such a forum, the Ohio Specialized Docket Practitioner Network was created to provide peer support and technical assistance to these programs. The Network is comprised of several sub-networks that meet by discipline. These sub-network meetings allow specialized docket practitioners to discuss the challenges and successes they have faced in their specific role on the specialized docket court team. In addition, the sub-network meetings offer opportunities for specialized docket professionals to provide program updates, discuss program operations, and discover innovative and effective strategies employed by other specialized dockets. If you are a member of a court's specialized docket team and would like to participate in the Network or learn more, then please contact our office at (614) 387-9425.

THE NEED: A concussion is a brain injury. The CDC estimates 1.6-3.2 million concussions occur yearly in sports and other recreational activities. A concussion can happen in any sport, and it is important to quickly recognize and treat the injury. Unfortunately, this does not always occur, and athletes are at risk for complications. Because of the emerging data regarding the impact of head trauma on cognition and behavior, psychiatrists and other physicians have a need to expand their knowledge and skills at recognizing post-concussive changes. These changes may lead to neurodegenerative diseases such as dementia. Psychiatrists and other physicians need to be able to provide patients and consumers with input regarding concussion prevention as well. This program is designed to meet these needs. **WHO SHOULD ATTEND:** This program is designed specifically for Psychiatrists, other Physicians, including Primary Care, Neurologists and Pediatricians, as well as Psychologists, Nurses, Social Workers, Counselors and other Mental Health Professionals.

In a world of adult-based solutions the temptation to spend these solutions on youth and adolescents populations is very powerful. Research shows youth stages of development differ greatly from adults. In effect, our focus with this program is to enhance the efficacy of staffs who work with youth and adolescents. These include service providers, treatment staffs, case management team, correctional staff and others like them. Many ask, What Works and How Well? The other question we must now ask now even more so in today's climate is justify, fund and have a plan to sustain these programs!
