

Memorandum for Motion of Reconsideration

For the Facts That the Dry docked vessel that is at ~14512 Glendale Avenue Cleveland Ohio Republic Near. [44128]- that is the birthright and private property of the Relator that is claimed in the UCC-1 Financial Statement with the receipt number that is *OH00262765531* was severely damaged by drunken drivers on both August 25th, 2022 and June 7th, . 2023 as shown in the attached evidence- And as the result of the damages the property- The relators wife is has been displaced and the property is at risk of the state of being condemned by the City of Cleveland due to the presumed abandonment and lack of caretaking of the property that was and is the sole responsibility of the Relator- As well as the fact that the Animal Protection League does continuously harass and threaten the Common Law Wife of the Relator as well as the Relator as the result of the Relator's abrupt absence and inability to properly care for his animals that are the product and property of the Realtor's registered business that is "RedSea Kennels Cle" that is registered via the State of Ohio

For the Facts That the Common Law wife of the Realtor does suffer from mental and physical exhaustion as the result of her husband's abrupt absence from and his inability to contribute to and properly provide for and protect their household- And that the wife was terminated from her primary source of employment due to the adherences that were a result of her mental and physical exhaustion- And that the wife was involved in a potentially Deadly motor accident that also was the result of mental and physical exhaustion that is the result of the Relator's abrupt absence and inability to properly provide for and contribute to their household- As well as the facts that tensions are at an all time high in the marriage due to the mental and physical and psychological exhaustion of the Relator and his wife due to the necessity for the wife to obtain multiple forms of employment to properly care for and provide for their shared household- And that the wife has been prescribed anti depressants and anxiety medications as the result of the Relator's abrupt absence and his inability to properly protect and contribute to and provide for their shared household-

And as the conclusion is that the Relator is at risk of the grievous loss of everything that he has built from the time he was released from prison until the time that he was abruptly and

unlawfully re incarcerated- As the facts remains that the Relator's registered address has remained the same since he was released from prison and no agents from the Ohio Adult Parole Authority had reached out to him or attempted to visit him since the year 2020- As the Relator's choice to exercise his rights to engage in the common occupations of life and to establish a home have been violated and the Relator has been put at severe risk for "grievous loss" as the result of the actions of The Ohio Adult Parole Authority-
