NCHS Urban-Rural County Classification

Centers for Disease Control and Prevention's National Center for Health Statistics (NCHS) County Classification System

- Developed for studying health differences across the urban-rural continuum.
- Six levels describing extent of social and economic linkage based on U.S. Office of Management and Budget's delineation of metropolitan (MSA) and micropolitan (MISA) statistical areas.

Prepared by: Ohio Development Services Agency,
Office of Research (April 2013)

MSAs in Ohio

Metropolitan Statistical Area (MSA) - Geographical region with relatively high population density at its core and close economic ties throughout the area. (Map: A-N)

Micropolitan Statistical Area (MISA) - Labor markets centered on an urban cluster with a population between 10,000 and 50,000 persons.

NCHS Urban-Rural County Classification

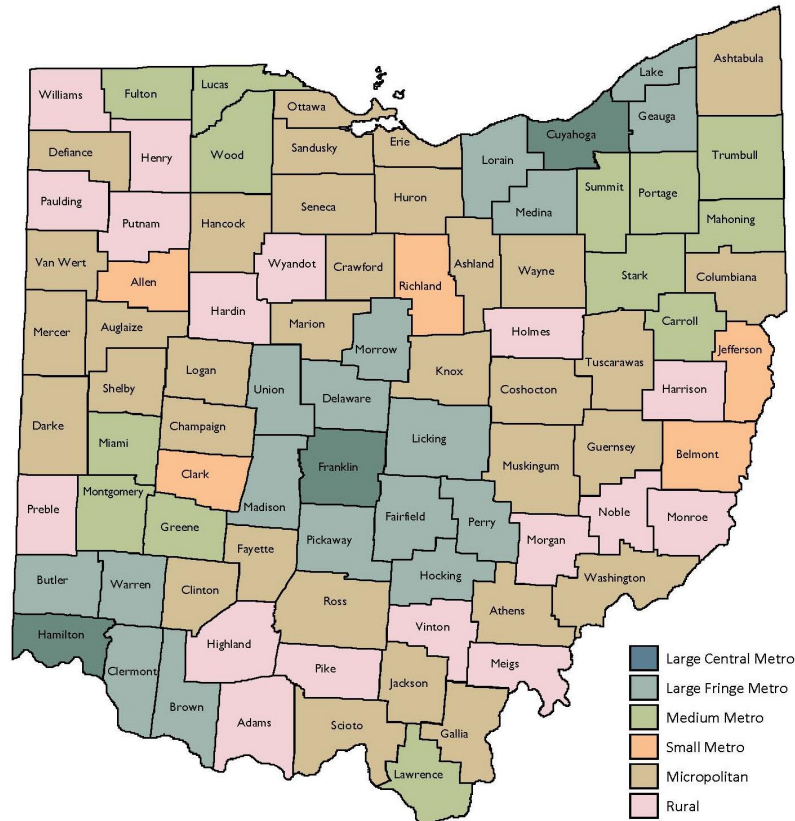

- **Large Central Metro** - Counties in MSAs of 1,000,000 or more that contain at least 250,000 inhabitants in any principal city of the MSA.
- **Large Fringe Metro** - Counties in MSAs of 1,000,000 or more that did not qualify as Large Central Metro.
- **Medium Metro** - Counties in MSAs of 250,000 to 999,999 populations.
- **Small Metro** - Counties in MSAs of less than 250,000 population.
- **Micropolitan** - Counties in MISAs.
- **Noncore (Rural)** - All others.
